### **DETAILED ACTION**

1. This Final office action is in response to the communication received on July 19, 2007.

Claims 1 and 45-46 have been amended. Claims 1-47 are still pending in the application.

### **Response to Arguments**

2. Applicant's arguments filed July 19, 2007 have been fully considered but they are not persuasive.

### **Claim Rejections - 35 USC § 103**

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayward et al (U.S. Patent No. 5,574,828). As set forth in the Office action mailed on April 19, 2007.

### **Remarks**

5. Applicant argues on page 11 that the claimed invention allows ..... and instantly see what the results will be without progressing all the way through the algorithm, and if the user is satisfied, the user can stop and accept the current recommendation as the final recommendation. In response, it is noted that these features (i.e., instantly see what the results will be without progressing all the way through the algorithm, and if the user is satisfied, the user can stop and

Art Unit: 3623

accept the current recommendation as the final recommendation) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant has amended claim 1 to indicate the ...an application and using the application...and displaying... iteratively. Applicant has further argued that Hayward fails to teach these limitations. The examiner respectfully disagrees. Hayward teaches application and a display. Note abstract and col. 13, lines 39-57 of Hayward.

Applicant further argues that the Examiner is correct that Hayward does not expressly disclose the feature (i.e., making the current recommendations optionally available to be displayed as desired by the user. Applicant respectfully requests that the examiner provide actual teaching instead of mere Official Notice. In response, applicant is directed to the teachings of Nelson (U.S. Patent No. 7,233,908) who teaches displaying outcome of a survey/questionnaire to a user. Note col. 5, line 40-62 of Nelson.

### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 3623

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
